

Internship Program

Aim : 1) To provide Professors a chance for better evaluation of the internship applicants through direct physical interaction/interview.

2) To facilitate meritorious students to interact with esteemed professors.

Intake : The possible students for a face to face interaction would be the participants of CDQ and Colloquium.

CDQ – The CV/Resume or any other document that the professor requires would be obtained from the participants beforehand and submitted to the Professor. The students would be the meritorious students of their particular institute based on the CDQ Round-1 (Aptitude Test). The professor can then choose the students from the list for a face to face interaction.

Colloquium – Again, the CV/Resume of the students presenting paper in the category of the Professor's interest would be provided to the professors, along with the particular paper presented by the participant. The professors can then evaluate a personally selected group of students for the direct interaction/interview.

Terms and Conditions: 1) The availability of students for interns or internship offers from the professors are not guaranteed by COMET. Only a possibility for these interactions would be provided. The selection for interaction and subsequent offer of internship would be on the discretion of the professor.

2) COMET only provides an infrastructure for internships, and no terms of internships (i.e stipend, duration, other particulars) are to be in any way related to COMET. These should be decided by an agreement of the student with the concerned faculty.

3) The selection for direct physical interaction would be at the discretion of the mentor/professor. Their decision would be final and binding on the participants. COMET would only provide the student's information to the professor and not affect the selection procedure in any way.
